FOR IMMEDIATE RELEASE

BeU STEM's Notice of FREE Educational Resources for Parents, Teachers, and Students During COVID-19 Pandemic

The team at BeU STEM understands that the uncertainty due to the novel coronavirus (COVID-19) pandemic is a concern for many individuals and families. The recent closings of schools and school systems due to the virus has left parents and students at home with questions about their health and education. A major attribute of BeU STEM is the inclusion of the community as we aim to “provide a future full of opportunities for all.” We know the most successful education of students occur within and outside of the classroom. With that, we are working to support the continued education of students while at home.

During the upcoming weeks, our team will provide links to FREE educational resources for students, parents, and teachers. We hope these resources will be of assistance to those of you at home and an interesting addition to your new daily routines. This information will be available on our website (www.beu-stem.com) and via our Instagram site. Please “like” our posts to share the information with others and feel free to share any resources you find useful.

The health and safety of everyone- students, parents, and teachers is important to BeU STEM. We encourage each of you to follow guidelines given by the World Health Organization (WHO) at www.who.int and the Centers for Disease Control (CDC) at www.cdc.gov as well as recommendations from your local community and health officials. If you would like additional information on available BeU STEM resources, please visit our website (www.beu-stem.com) or send an email to (info@beu-stem.com) Community and K-12 education administrators may also contact us (info@beu-stem.com) for details on programs and services available from **BeU STEM**.

#staysafe; #inthistogether
